SUBJECT INDEX

A

Advance Directives, 57
Advanced practitioners, identifying practice characteristics, 308
Advocacy, 179
Ageing population, 1
Anaesthetic nurse intervention affecting perioperative stress, 276
Analgesics in chronic pain
  general principles, 153
  step 1, 213
  step 2, 258
  step 3, 318
Arglaes vs. Tegaderm dressing for peripheral arterial/central vascular catheters, 187
Arterial catheters, peripheral, Arglaes vs. Tegaderm dressing, 187
Australia
  contextualizing critical care family needs through triangulation, 161
  education of registered nurses for paediatric ICU practice, 74

B

Bagging, 239
Bereaved, suddenly, in cardiac care units, care, 144
Brain death and nursing care challenges concerning patients and families, 21
Breast cancer, anaesthetic nurse intervention affecting perioperative stress, 276

C

Canada, paediatric intensive care education by distance learning, 137
Cardiac arrest, staff attitudes to relatives' presence during cardiopulmonary resuscitation, 288
Cardiac assessment, 283
Cardiac care units
  care of suddenly bereaved in, 144
  thrombolytics, nurse-initiated, 219
Cardiac output, augmenting, 244
Cardiac rehabilitation, evidence for effectiveness, 38
Cardiac-related chest pain, gender-related referral behaviour patterns, 192
Cardiopulmonary resuscitation, *see* Resuscitation
Catheters, peripheral arterial/central vascular, Arglaes vs. Tegaderm dressing, 187
Central vascular catheters, Arglaes vs. Tegaderm dressing, 187
Chest pain, cardiac-related, gender-related referral behaviour patterns, 192
Children
  education about intensive care
    by distance learning, Canadian example, 137
    of registered nurses in Australia/NZ for paediatric ICU practice, 74
  needs, literature review and report of modified Delphi study, 66
  parents of, *see* Parents
Circulatory assessment, 283
Clinical effectiveness, 159
Colony stimulating factors, 49
Consulting on critical care, mental health component, 261
Coronary heart disease
  cardiac rehabilitation in, evidence for effectiveness, 38
  gender-related referral behaviour patterns with chest pain, 192
Cystic fibrosis, dornase-alfa, 101

D

Death
  brain, and nursing care challenges concerning patients and families, 21
  murder charge as occupational hazard, 208
  sudden, in cardiac care units, care of bereaved, 144
Delphi study of needs of critically ill child, modified, 66
Distance learning, paediatric intensive care education by, Canadian example, 137
Dornase-alfa for cystic fibrosis, 101
Dying patient in ICU, nursing the families of, 59

E

ECG and nurse-initiated thrombolysis, 219
Education about paediatric intensive care, *see* Children
Electrocardiography and nurse-initiated thrombolysis, 219
Endotracheal suctioning, 124
  short-term ventilated patients, assessing need, 170
Evidence-based practice
  barriers to, 231
  establishing, 30
Evolution of intensive care (1962-1983), 252
Experiences of patients of critical illness or severe injury and care in ICU, 294

F

Families and relatives, *see also* Parents
  brain death and challenges concerning, 21
  nursing/care/needs of, 117, 203
    contextualizing through triangulation, Australian Study, 161
    with dying patient, 59
    suddenly bereaved in cardiac care units, 144
  resuscitation and, *see* Resuscitation
  visiting, nurses' beliefs about/attitudes towards, in three district general hospitals, 262
Flaps, microvascular free, after maxillofacial surgery, 225

G

Gender-related referral behaviour patterns with cardiac-related chest pain, 192

 © 1998 Harcourt Brace and Co. Ltd

H

Heart, *see entries under* Cardiac
Hip replacement, anaesthetic nurse intervention affecting perioperative stress, 276
History of intensive care
  of future, 217
  1962-1983, 252
Homicide charge as occupational hazard, 208
Hyperinflation, manual, 239

I

Information, preoperative, effects on perioperative stress, 276
Injury, severe, patients' experiences of, and care in ICU, 294
Intensive care unit syndrome, 294

K

Killing a patient, accusation, 208

M

Manual hyperinflation, 239
Maxillofacial surgery, microvascular free flaps after, 225
Meningococcal disease, 91
Mental health, *see* Psychological well-being
Microvascular free flaps after maxillofacial surgery, 225
Murder charge as occupational hazard, 208
Myocardial infarction
  gender-related referral behaviour patterns with chest pain, 192
  thrombolytics, determination of suitability for, 219

N

Needs
  critically ill child, literature review and report of modified Delphi study, 66
  family, *see* Families
New Zealand, education of registered nurses for paediatric ICU practice, 74
Nitric oxide, inhaled, safety issues, 271
Nurse practitioners, advanced, identifying practice characteristics, 308

O

Opioid analgesics, 258, 318
Organ donation, 21

P

Paediatrics, *see* Children
Pain
  cardiac-related chest, gender-related referral behaviour patterns, 192
  chronic, analgesics, *see* Analgesics
Parents, *see also* Families
  anxiety due to abnormal behaviour on withdrawal of sedation, 8
  staff attitudes to presence during resuscitation, 3
Patients' experiences of critical illness or severe injury and care in ICU, 294
Peripheral arterial catheters, Arglaes vs. Tegaderm dressing, 187
Polyurethane vs. silver ion-containing dressing for peripheral arterial/central vascular catheters, 187
Preoperative information affecting perioperative stress, 276
Psychological stress, perioperative, preoperative information affecting, 276
Psychological well-being
  in intensive care
    patient's experiences concerning, 294
    psychiatric nurse role, 261
  long-term following intensive care, assessment, 108
Publishing one's work, 107

R

Reflection, 96
Registered nurses in Australia/NZ, education for paediatric ICU practice, 74
Relatives, *see* Families; Parents
Resuscitation, cardiopulmonary, staff attitudes to family/relatives' presence during
  cardiac arrest patients, 288
  child patients, 3
Role extension or expansion, perceptions of nursing and medical staff on, 11, 82

S

Sedation, parental anxiety due to abnormal behaviour on withdrawal of, 8
Sepsis, meningococcal, 91
Sex differences in referral behaviour patterns with cardiac-related chest pain, 192
Silver ion-containing vs. polyurethane dressing for peripheral arterial/central vascular catheters, 187
Stress, perioperative, preoperative information affecting, 276
Suctioning, endotracheal, *see* Endotracheal suctioning
Surgery
  maxillofacial, microvascular free flaps after, 225
  preoperative information affecting perioperative stress, 276

T

Tegaderm vs. Arglaes dressing for peripheral arterial/central vascular catheters, 187
Thrombolysis, nurse-initiated, 219
Tracheal suctioning, *see* Endotracheal suctioning
Trauma, severe, patients' experiences of, and care in ICU, 294

V

Ventilated patients, manual hyperinflation with, 239

W

Writing up one's work, 107
